commercial poster display systems

EASY LOADER frames, light boxes and poster hangers have been produced under licence in Australia since 1999.

Uniquely easy to use, the EASY LOADER framing system allows you to change your posters in seconds. Now you can change your images as often as you like.

EASY LOADER poster frames are being used by an ever-increasing number of shopfitters, large format printers and sign makers, right across the country. EASY LOADER frames, display stands and light boxes can be seen in all the major cities in Australia. Maybe you too, would like to make use of our products. We are only a phone call away.

Customers have come to realise that our products are of a good quality, work well, are well priced and most important of all, we at SNAPPER offer good service.

EASY LOADER frames are the basis for fantastic displays and are easily adapted to suite your requirements.

EASY LOADER frames are being used by the likes of Caltex, KFC, Hoyts Cinemas, Liquor Barons, Target, Woolworths Petrol Stations, Theo's Liquor Group, Blockbusters and our local butcher, to name but a few.

Pictured below is the newly refurbished cosmetic counter in David Jones, Karrinyup (Perth).

EASY LOADER frames are used for a number of reasons:

- You simply snap open the frame to change the poster.
- This saves you time and money
- If the fluorescent tubes need to be changed, the opal acrylic is easily removed from the frame and maintenance becomes a SNAP.

- We provide a quick response to our customers needs.
- The shopfitter's job is made easier.
- Our snap system is of the best on the market, of the highest quality and works extremely well.

To receive further information or samples of our products, please do not hesitate to call.

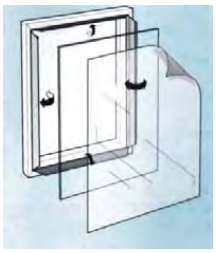
commercial poster frames

Mini EASY LOADER

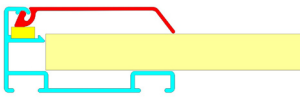


Classic EASY LOADER

Double-Sided EASY LOADER

UniLOADER

Maxi UniLOADER



Jumbo EASY LOADER

Cross Section of Frames

Mini EASY LOADER frame with mini snap.
These are our biggest seller and are suitable for frames from A5 up to 1500mm. They normally have a 5mm coreflute backing and 1 or 2 mm clear overlay. The backing board is a loose sheet and is easily replaced. EASY LOADER frames have a smooth and easy snap action. Width - 26mm, Thickness - 13mm
Snap section covers 10mm of poster.
The outer frame dimension is 35mm larger than the poster size.
The mini frame can accept material up to 7mm thick. Unfortunately they cannot be sold in knock down form.
Mini EASY LOADER frames are also available with round corners.

Classic EASY LOADER frame with classic snap.
Width - 42mm, Thickness - 12.5mm, Snap covers 15mm of poster. The outer frame dimension is 55mm larger than the poster size.
These classic frames screw together and can be shipped in knock down form. They can accept material up to 8mm thick. Classic frames can be made from A5 size right up to 3m x 2m.
The classic snap can be interchanged with the mini snap on any of the profiles.
EASY LOADER frames are also available in a tamper resistant option in both sizes. The tamper resistant snap comes down hard up against the clear overlay and does not leave a gap in which to get a finger hold to open it. A thin blade has to be slipped in under the snap section to lever it open. These frames can be fitted with additional springs to make them more difficult to open. The Classic frame can be fitted with security screws as well. The frames cannot be opened without first removing these security screws.

Double Sided EASY LOADER frame
Double sided frames are especially useful in the manufacture of display stands and for window displays. They can be fitted with hanging lugs or with cable systems for hanging displays.
Width - 43.5mm, Thickness - 18.5mm
EASY LOADER frames are normally supplied with a backing sheet and a clear overlay, but empty frames can also be supplied.
EASY LOADER frames fitted with an opal acrylic backing panel, are ideal for light boxes. Access to the light box can then be made through the front of the frame. Both classic as well as mini frames can be fitted to light boxes and display stands.

UniLOADER frame with flat snap - Our new side opening frame
Width - 24mm, Thickness - 15mm
Snap covers 11mm of poster and there is no join on the front face. The outer frame dimension is 25mm larger than the poster size.
These Uni frames screw together and can be shipped in knock down form. They can accept material up to 6mm thick. Uni frames can be made from A5 size right up to 2.4m x1. 2m

Maxi UniLOADER frame with flat snap - Our new side opening frame Width - 32mm, Thickness - 18mm
Snap covers 19mm of poster and there is no join on the front face. The outer frame dimension is 25mm larger than the poster size. They can accept material up to 9mm thick.

Jumbo EASY LOADER frame - Our new versatile profile for flex face signs, edge lit light boxes and jumbo sizes.
Width - 65mm, Thickness - 32mm
These frames screw together and can be shipped in knock down form. Flex face signs, mounted on a framework up to 30mm x 25mm can be fitted into this profile. They can accept material up to 13mm thick

snapframes

- Front loading aluminium “snap open, snap shut” poster frames
- Quick and easy poster change
- For interior or exterior use.
- Antiglare PVC cover sheet
- Silver anodised finish

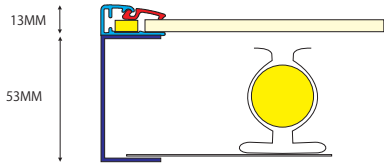
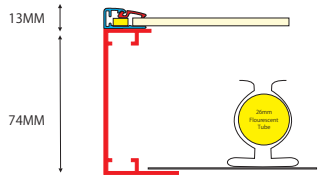
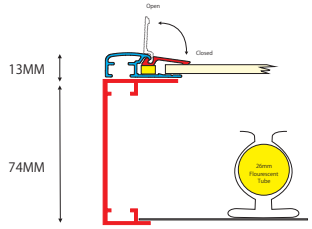
snap frame back lit light boxes



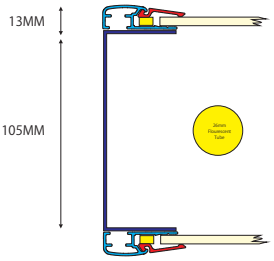
SLIMLINE
LIGHT BOX



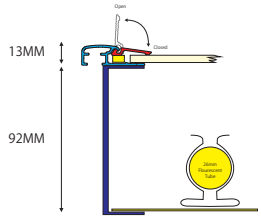
EXECUTIVE LIGHT BOX
WITH MINI FRAME



EXECUTIVE LIGHT BOX
WITH CLASSIC FRAME



DOUBLE SIDED
LIGHT BOX



RECESSED
LIGHT BOX

EXECUTIVE LIGHT BOX (preferred choice)
This is a 74mm deep box with a 13mm thick EASY LOADER snap frame attached.
Light boxes less than 1200mm long are normally fitted with mini EASY LOADER frames and those longer than 1200mm are fitted with classic EASY LOADER frames.

Executive light boxes can be made from A4 size up to 3m x 2m for indoor use. For outdoor
use, we do not recommend units bigger than 2½ square meters.
Executive light boxes can also be fitted with multiple faces for use as menu boards.

Maintenance of the electrics is easily accomplished, by simply snapping open the frame and removing the opal acrylic back panel.
For safety reasons, the back panel is screwed into place with a number of small recessed self tapping screws.

SLIMLINE LIGHT BOX
A 52mm deep box with a 13mm thick EASY LOADER snap frame attached. The fluorescent tubes are spaced a little closer together to minimise banding (hot spots) Slimline units are only made up to 1200mm x 900mm.

DOUBLE SIDED LIGHT BOX
Double sided light boxes are either 92 or 105mm deep with a 13mm thick EASY LOADER snap frame attached to both sides. The 92mm box is for use with mini frames and the 105mm deep box is for use with classic frames. The fluorescent tubes are spaced a little closer together to minimise banding (hot spots)

Both single and double sided light boxes can be fitted to custom made display stands, such as the executive stand.

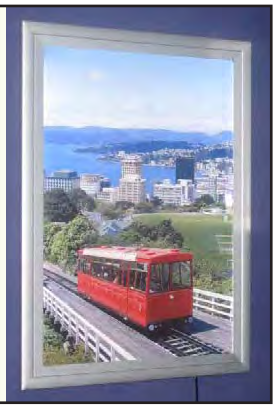
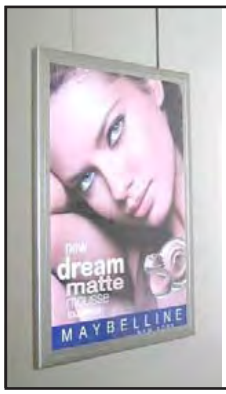
UltraSlim13 with Mini Easy Loader Frame
UltraSlim13 withClassic Easy Loader Frame
UniLite18 with Maxi UniLoader Frame
Ultra32 with Jumbo EASY LOADER Frame and LEDs
Ultra32 with Jumbo EASY LOADER Frame and T5 Fluorescent Tubes
Ultra32 with Jumbo EASY LOADER Frame, Classic snap and LEDs.

Our light boxes are manufactured to the highest standard, ensuring you of the most even light distribution possible, thereby creating powerful eye-catching displays, that will bring your images to life.





Light boxes are a proven effective marketing tool and are used in areas such as retail outlets, gyms, stations, night clubs, bars, banks, malls, supermarkets, cinemas, show rooms, cafes, trade shows, trains, busses, offices, reception areas and fast food outlets.

UltraSlim13 - 13mm Edge Lit EASY LOADER Light Box (Illuminate Poster Frame)
We have used a combination of the latest LED and acrylic technology to develop this incredibly thin 13mm environmentally friendly light box. The LEDS and the specially manufactured acrylic panel are inserted into our EASY LOADER snap frames to create the thinnest snap frame light box in the world.
The UtraSlim13 light boxes come in standard sizes ranging from A5 to A1 and can be made in custom sizes up to 1480mm x 600mm.

Using UltraBrite LED's, we can increase the max size to 1480 x 900mm

Now also available in a double sided unit.

Powered by a 12V DC adapter, these units are incredibly safe and economical to run and as everyone is aware, LEDS have a life expectancy in excess of 50,000 hours, giving years of continuous use. These long life ultra slim light boxes will take your displays to another level.

UniLite18 - Using the same technology as the UltraSlim13, but with a slightly thicker light guide panel, enables us to make these units up to 2400 x 1200mm.

Ultra32 - 32mm Edge Lit EASY LOADER Light Box
Using the latest T5 technology and combining this with our tried and tested EASY LOADER snap frame, enables us to produce this 32mm thick edge lit light box. This is the thinnest aluminium snap frame light box in the world. With a snap frame system you can change you graphics in minutes.

The technology used in these units produces an incredibly even distribution of light making them extremely energy efficient.

These slim light boxes come in standard sizes ranging from A2 to 2A0 and can be made in custom sizes up to 3000mm x 1200mm.

Aurora

LED Light Box

Make a real impression

magnetic face edge lit light boxes

- Aurora19 & Aurora25 are LED edge lit aluminium light boxes
- Ultra slim design
- Single sided or double sided.

- Individually packed in cartons.
- A1

Chalkboard insert option

Booster A-Board

- Simple design folding outdoor poster stand.
- Weather proof UV stable antiglare magnetic poster cover sheets with colour matched printed border.
- All steel construction, zinc phosphate pre-treated and polyester powder coated.
- Folds flat for storage.
- A1

Adjust-a-Stand

display system

The Adjust-A-stand is a multi purpose system that can be customised to your requirements. We offer these displays in several combinations of literature holders, snap frame poster holders and banner rails.

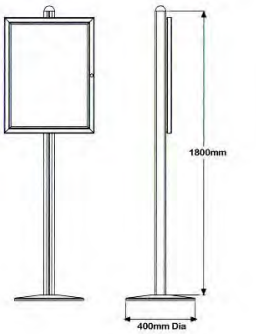
The 1800mm tall pole has a groove on either side, which the display items are slotted into. They then slide to the desired height before being fastened into place.

The Adjust-A-Stand allows you to advertise your business whilst distributing supporting promotional material.

The Adjust-A-Stand is ideal for trade shows. The 400mm diameter bases provides stability and the size demands attention. Combined, the base and pole make a solid, sturdy display with many options for displaying both literature as well as products.

Essentially the unit comprises an aluminium extruded pole screwed to a steel base plate. To this we can fit

- Single sided frames A4 to A1- either on one side or on both sides.
- Single sided edge lit frames A4 to A1
- A double sided frame onto the top of the pole A4 or A3
- Banner rails—on one or both sides 300mm to 500mm wide
- Brochure holders—on one or both sides A3
- Lockable frames
- LCD multi media players
- Custom units to meet your requirements



double sided frames & display stands

Mall Stand

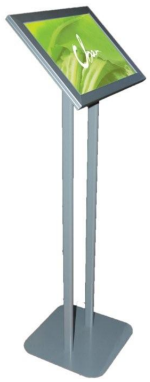
Mall Stands are normally made A2 orA1 but can be made to custom sizes up to A0 size. The mall stand will normally have a steel spun base, a natural anodised aluminium pole upright and a natural anodised double sided EASY LOADER snap frame.

Executive Stand

Executive Stands are normally fitted with 3 off A3 double sided EASY LOADER snap frames, however we can custom make them with different size and quantity frames and with light boxes. They can be made either double or single sided.

2 Versions are available. A cheaper one with aluminium uprights screwed into a steel base and a more expensive all steel one with a welded construction.

The aluminium one has grooves in the aluminium uprights which are tailor made for mounting brochure holders and other display items. This is a very versatile display stand.



Menu Stand & Informer Stand

Menu & Informer Stands are normally fitted with A3 UniLoader snap frames, but can also be custom made to suite your needs. The frames can be lit up using internal LEDs which run on 12V DC.

2 Versions are available. The cheaper one has a aluminium upright and the more expensive one is an all steel unit except for the snap frame, which is aluminium.

T-Stand

T-Stands are normally A2 or A1 but can be custom made to any size.

The steel powder coated legs support a double sided EASY LOADER snap frame.

double sided frames & display stands cont...

Econo Mall Stand

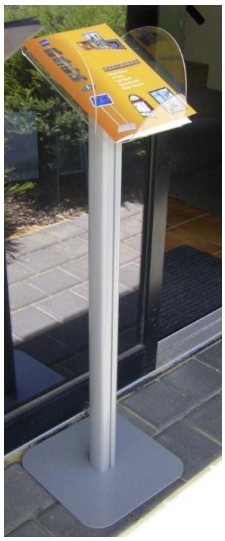
The Econo Mall Stand is normally either an A4 or an A3, but can also be custom made .

It is constructed using a powder coated steel base, a powder coated aluminium upright an EASY LOADER double sided snapframe.

Counter Stands

We have the ability to manufacture counter stands using either double sided or single sided EASY LOADER snap frames and acrylic.

We have a laser cutter and an acrylic bender and we are able to cut and bend acrylic stands to suite your requirements.



Brochure Stand

Brochure Stands have a steel base and an aluminium pole with an acrylic brochure holder at the top.

The acrylic brochure holders can be made to any size.

More brochure holders and poster holders can be fitted to the pole.

This unit can be fully customised.

SNAPPER DISPLAY SYSTEMS

writelite panels

Using our SUSPENDIT Poster Hangers we have developed the WriteLite edge lit fluorescent “blackboard” panel for those important daily specials or quick messages.

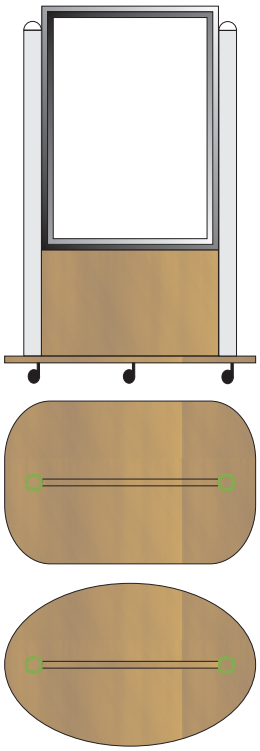
These units can be custom made and are lit with 12V LEDS. You simply write on them with a liquid chalk pen and Voila! you have a fantastic eye-catching display.

Hang them up our mount them on a wall.

Key Benefits

- Cost effective.
- Stylish.
- Re-useable
- Any width up to 3m.
- Can be any length.
- Available off the shelf.
- Simple and easy.
- Can be supplied in kit form.

communicator mall stands



"The shape of the base can be altered to your requirements or for added stability."

The Communicator mall display stand is designed to display advertising posters in a double sided EASY LOADER snap frame.

The unit can also be fitted with SlimLock key lockable frames or notice boards, light boxes, brochure holders, slat wall and product display shelves. The Communicator Mall Stand is your window to the shopping public.

The Communicator is fitted with castors underneath the base so that it can be moved anywhere in the mall with ease. The Communicator is normally fitted with a double sided EASY LOADER snap frame for posters measuring 1000mm x 700mm, but the unit can be custom made to suite your requirements.

The total height can also be adjusted to suite your individual needs and the base as well as the uprights can be fitted out with a range of acrylic brochure holders or product display shelves to ensure your display is as effective and informative as possible.

Poster Display. This units can be fitted with a double-sided EASY LOADER snap frame, SlimLock lockable notice board, edge lit light boxes or Pro-Motion multi media players. The frames normally fitted, take a poster measuring 700mm x 1000mm in portrait fashion but can be made to any size if quantities are sufficient.

Base - 25mm pre-finished board. Normally in a Beach wood grain but can be any colour if quantity is sufficient. The base is fitted with 4 normal castors and 2 off lockable castors. A 5mm thick powder coated steel plate can be screwed to the under side of the base for added stability.

Filler Panel - 25mm pre-finished board same as the base. The size of the filler panel is varied if the unit needs to be taller or shorter for a given poster frame size. The filler panel can be fitted with a smaller snap frame, acrylic poster holders, acrylic brochure holders, product holders or other items as required by the client. The filler panel can be left out if not required.

Uprights – 60mm x 60mm natural anodised or powder coated aluminium pole with 4 screw flutes. The screw flutes are used for mounting the pole onto the base with screws passing through from the bottom of the base up into the pole. The pole has 4 grooves/ flutes used for mounting snap poster frames, brochure holders or any other item you wish to attach to the pole or stand. The ends are capped with a rounded plastic chromed cap or a flat end cap.

POLEMORPHICS®
DISPLAY SYSTEM

This innovative display system enables any 2mm thick rigid sheet material to grip into the “pole” without the need for fixings or brackets. Simply push the panel or graphic holder into the slot in the pole and it is gripped securely in place. It is a truly revolutionary display solution that is easily adaptable to suit any interior display situation—retail, banks, car dealerships, travel and estate agents, museums, galleries, hotels, etc

Key Features

- Beautifully engineered, strong and safe
- Cheaper than wire or rod display systems, much faster to install and significantly more flexible.
- Does not require professional installers and associated costs and inconvenience
- Flexible polycarbonate poster holders offer safety to passers-by and are indestructible—unlike rigid acrylic.
- Can be free-standing or permanently fixed
- Easily and quickly updateable by untrained staff

Using a combination of standard components and custom graphic panels, Polemorphic provides the ideal combination of a bespoke look with the cost and low risk derived from a standard, pre-tooled and tested product.

The perfect solution for window presentation and an interesting opportunity as a space portioning system

Pro-Motion
MULTI MEDIA PLAYERS

lcd screen advertising players

Deliver Digital Signage To A Captive Audience.

Digital Signage is the use of digital technology such as a digital screen and software to deliver content such as information, advertisements and entertainment to a captive audience.

Using a LCD Multi Media Player, digital signage allows for the greater control and flexibility over how your message is delivered to your targeted audience.

Snapper distributes Pro-Motion LCD multi media players ranging in size from 7” to 70”. The units we normally stock are a fully protected vandal resistant unit with a plate glass front cover, a lockable cover to secure the memory card or internet connection and a lockable mounting bracket. These can either be a stand alone unit operating off a memory card or they can be networked units, controlled over the internet from a location anywhere in the world.

The supplied networking software enables the multi media player to be easily controlled as a single unit or within a group. The software is extremely versatile, enabling you to control a multitude of multi media players from a single location. Multi media players can be made to play different files at different times of the day and on specific days. Quick messages can be downloaded instantly to the networked players, either singularly or as a group, within seconds.

OPTIONS

- Sizes from 7” to 70”
- Variety of styles and colours
- Stand alone units using memory cards
- Networked units using LAN, Wi-Fi or 3G – Server software supplied
- Touch screen
- Display stands
- Variety of mounting options
